

CULTURALLY RELEVANT EDUCATIONAL CONTENT

Learning Bird is committed to decolonizing educational content, and supporting reconciliation in schools and communities. We work in collaboration with First Nations from coast-to-coast to help preserve language and culture, and integrate Indigenous perspectives into classroom resources for grades 6-12. Through our partnerships, we've created hundreds of digital resources for the classroom that showcase Indigenous voices and perspectives.

Many Indigenous schools have a desire to add digital resources to their classrooms, especially culturally relevant resources that reflect local customs, teachings, and histories. However, many lack the equipment, resources, and teacher support to achieve this. Learning Bird makes it easy for teachers to enhance instruction with engaging digital content that reflects their community using the tools they have today in the classroom.

WORKING WITH LEARNING BIRD

Our team of teachers works alongside your school to help identify needs, and create outlines and scripts that meet your educational and curriculum goals. Content is produced in our in-house studio and made available on our platform for easy access by teachers.

CULTURALLY RELEVANT AND MEETS CURRICULUM NEEDS

Students learn best when the content they are engaging with is relevant and they can see themselves reflected in it. This is why we offer resources that are inclusive and built in collaboration with our partner communities. Our content supports math, science, English, social studies, as well as language and culture.

COLLABORATIVE CONTENT CREATION PROCESS

Ensuring content is culturally relevant means developing resources in a collaborative way, with full participation and consultation of schools and communities. This is why we have an established collaboration process to prioritize content needs, develop plans for resource collection and creation, and gather content approvals as resources are created. Content creation must be a team effort that involves teachers, Elders, Knowledge Keepers, and language/culture experts.

CLASSROOM-READY, SCALABLE PLATFORM

Our award-winning platform enables teachers to quickly find relevant content to use with their students. Teachers can create playlists of their favourite resources, mark items for future use, or even assign specific resources to their class.

SUPPORT FOR SCHOOLS WITH CONNECTIVITY ISSUES

Many schools with a limited Internet connection find it challenging to access and integrate digital resources into their classrooms. Learning Bird offers a Nest Server option, which places a local server in the school, so bandwidth is no longer a limitation.

TEACHER TRAINING AND PROFESSIONAL DEVELOPMENT

A key element of any successful technology implementation is to ensure that teachers have thorough training and unlimited support. We offer in-person training workshops where we not only look at how to use the platform, but also how to integrate content into instruction. We then follow-up with a second visit to do one-on-one coaching with teachers and can offer specialized professional development sessions on a variety of topics.

WHAT MAKES LEARNING BIRD UNIQUE?

- ✓ Custom programs to fit the needs of every school
- ✓ Onsite teacher training and one-on-one coaching
- ✓ An established, consultative approach to content creation
- ✓ Ongoing teacher support via phone, email, and live chat
- ✓ Offline access for schools with limited Internet connections
